

SPACE FOR RESONANCE

Image for the weekly letter for Sunday, Februari 15th 2026, no 6

Quote:

Experiencing and delving into it for yourself is, as it were, discovering and learning to "speak" with heart and soul an ever-evolving language. A language that searches, that touches, imagines, expands. A language that helps us when we do not know what to say, what to do, what to think. Images, rituals, music, and poetry can be helpful in this, precisely because they don't provide precise explanations. They invite us to be receptive, without preconceptions, and to let go of our thoughts for a moment. They require an attitude in which we consciously put our capacity for wonder at the forefront. We are lifted up, not away from the world, but deeper into it.

Explanation of the word "resonance":

The expression originates from music, where a string of one instrument vibrates (echoes) when another instrument is struck nearby.

It is used to indicate that a speech, plea, or idea is received positively and has an emotional impact.

Synonyms/related expressions: Strike a chord, resonate.

Warm regards on behalf of the beeldengroep, Cora Bangma
