

Where Love gets a voice

Image for the weekly letter for Sunday, June 1, 2025, no. 16

Quote:

"Places where we truly feel the responsibility to carry each other and patiently tolerate each other. Not for a while, but for a long time. Where we realise together that 'being loved' must come off the paper and can be felt in how we listen, speak and be present with each other." .. ". Where you and everyone else is seen and acknowledged and where this is confirmed in every meeting. Through me, through you, through our actions"

Love finds its 'voice' when you and I make it tangible: by truly listening to the other; by protecting, cherishing, and showing that the other is 'loved.' Not with grand words, but perhaps even more through the small, sometimes deeply felt gestures. By choosing to be a loving person.

Warm regards on behalf of the beeldengroep,
Arno Been
Winterswijk
