

Make way for diversity

Image for the weekly letter for Sunday August 2, 2026 no 24

Citaat:

In this text, I sense that diversity - of species, cultures and people is not just an aside, but an inseparable part of life. So many connections, which I do not always see or feel, yet am still part of, that really amaze me. And that also brings me to my sense of responsibility. This touches on my humanity. Because diversity and being part of a bigger picture is not just about the connections in nature. It also shapes how I relate to human diversity.

Additional text by Jill Eekhart:

The image of colorful pinwheels in the sky gives me a sense of freedom and joy—and that is what a multitude of colors can bring when they are allowed to exist.
